Dr. Barry Turnbull joins BioBridges, LLC as Principal Consultant

Industry veteran to help emerging biopharma firms Span The Clinical Divide™

WELLESLEY HILLS, Mass. – January 6, 2009 – BioBridges, LLC, a clinical development consultancy serving the biopharmaceutical community, announced today the appointment of Barry Turnbull, PhD, to Principal Consultant.

Dr. Turnbull will provide statistical consulting services, including Clinical Trial Design & Protocol Development as well as CRO Biostatistical and Data Management Oversight to BioBridges' client portfolio.

BioBridges' current clients will benefit by having access to one of the industry's top statistical minds. With over 25 years of industry experience, Dr. Turnbull has been involved in countless trials assisting clients in overcoming their challenges.

"Barry's credentials in the Biostatistics community are unmatched," said Andrew Young, managing partner, BioBridges. "We're excited to have him aboard. His impressive knowledge in trial design and experience in FDA statistical representation will be a significant asset to our clients. In addition, Barry will head our Biostatistical Insourcing Program, a new client offering from BioBridges."

Prior to joining BioBridges, Dr. Turnbull was a principal staff member at BattelleCRO (formerly CareStat) located in Newton, MA. Prior to this, Dr. Turnbull was Vice President of Biostatistics and Clinical Data Systems for AAI Pharma, a Boston based clinical trials

consulting firm. Before that, he served as Vice President, Biostatistics and Clinical Data Systems at Medical and Technical Research Associates.

Dr. Turnbull was the founding chair of the Biostatistics and Data Management committee for the Massachusetts Biotechnology Council. In addition to his consulting work, he currently lectures on Biostatistics at Harvard - Massachusetts Institute of Technology, HST Division.

Dr. Turnbull received his doctorate from Boston University with a concentration in Biostatistics and Experimental Design. He also completed a Charles Dana Human Research post-doctoral fellowship at Tufts/New England Medical Center.

About BioBridges, LLC

BioBridges leverages decades of experience successfully managing clinical trials in a wide range of therapeutic areas. Its Clinical Connect™ practice helps emerging clinical organizations to “build bridges” between all areas of the clinical development lifecycle—from protocol inception, through execution and submission. BioBridges can be reached at www.biobridges.com or 781.416.0909.
